

Grafting Clips

Grafting clips are suitable for grafting several kinds of plants according to the Japanese grafting method. The clips are made of a soft and flexible material with excellent light density. This material ensures easy grafting and prevents damage to the plant.

The grafting clip is available in two models:

- Standard model;
- Stick slot model: with stick slot for supportive stick.

At this moment we use two different materials:

- silicones;
- alternative silicones.

The alternative material is slightly less bright and somewhat less flexible compared to original silicones. The alternative material is, of course, cheaper.

Material: silicones.

Standard model: 1.5/2.0/2.5 mm

Stick slot model: 1.5/1.8/2.0/2.3/2.5/3.0 mm

Packaging: 10,000 per bag, number of bags per box depends on the size of the model.

Material: alternative silicones

Standard model 1.5/1.6/2.0/2.5 mm

Stick slot model 1.5/2.0/2.5 mm

Packaging: 10,000 per bag, number of bags per box depends on the size of the model.

Other models or uncut grafting clips are available on request.

Type	Standard Silicones	Stick Slot Silicones	Standard Alternative	Stick Slot Alternative
1.0	6TBHMS-WT	60 X 40 X 33 cm	25,000	750,000
1.2	6TBHMO-WT	60 X 40 X 33 cm	20,000	600,000
1.5	6TBUM-WTN	60 X 40 X 33 cm	15,000	450,000
2.0	6TBUF-WT	60 X 40 X 33 cm	15,000	450,000
2.5	6TBHM-WTN	60 X 40 X 33 cm	22,000	660,000
3.0	6TBHMO-BAM	60 X 40 X 33 cm	20,000	600,000
