

Stem Clips

Clips ensure the best plant stem guidance in the production of vegetables and other crops. Bato offers various types with different diameters. By using the clips it is no longer necessary to keep turning the plant stems along the twine with the possibility of damage. Clips do not restrict the growth of the plant, so they ensure increase in yield and quality. The locks of Bato clips ensure an easy and efficient use. Best results are achieved by means of regular clipping and the use of maximum 1,000 m/kg twine on the drop hooks.

Type	Colour	Article No.	Diameter (mm)	Dimensions carton (cm)	Pcs / carton	Pcs / pallet
19	white	6CL19-WTN	19	60 x 40 x 48.5	7,000	135,000
