

The truss hook 10 and 12 cm are used by tomato growers to support the trusses. They are essential items for when truss stems are shorter. The new construction of the hooks ensure an optimal grip on the twine. One of the fish hooks barbs has to be pulled behind the string while the hook side has to be placed behind the first or second tomato in the truss.

To complete our assortment, we developed the GESP truss hook. This hook provides maximum support of the trusses. Damage to the plant is prevented by the special shape of the product. This product is very suitable for heavy truss tomatoes.

Type	Article No.	Colour	Dimensions carton	Pieces / carton	Pieces / pallet
10 cm	6THRDA-WTN	white	60 x 40 x 33 cm	13,000	390,000
10 cm	6THRDA-TCN	terra cotta	60 x 40 x 33 cm	13,000	390,000
