

Danish Flower Trolleys

The Danish Flower Trolley has been developed to fulfil the specific requirements of the horticultural industry and is particularly suitable for pot plants and flowers. The Danish Flower Trolley is widely used on markets by market traders, for transporting loose objects, for storage, for moving to a new site etc. In short, this multi-functional trolley is extremely suitable for the transport and/or storage of very many different products!

This is the most used trolley for pot plants and flowers in the horticultural industry. This container is used all over the world, from Scandinavia to Africa, from Canada to Australia. It can be supplied with adjustable height shelves for maximum distribution and display capacity. Furthermore, the trolley can be dismantled to a fraction of its size for return or storage.

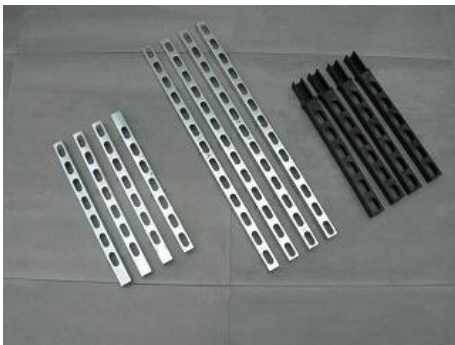

Given that the trolley can also be used as a display product, the flowers and plants and all other imaginable products can be transported directly from the grower, depot and factory to the customer in the shop without the products having to be handled individually on the way. This leads to less damage to the goods and lower distribution costs. In addition, the containers are fitted with wheels, which means that replenishing stock and renewing sales displays in the shop becomes faster and simpler.

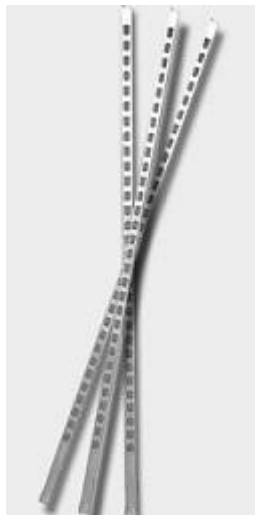

Specifications:

External dimensions:	1350 x 565 x 1900 mm
Internal dimensions:	1270 x 545 x 1735 mm
Weight of chassis:	15 kg
Weight of upright:	2.3 kg
Weight of shelf:	4.5 kg

Shelf support steel 39 cm / 65 cm

Uprights 1.80 m

Danish Shelf
