

Clip Ring

Clip rings are used to fasten plants in pots, small vegetable plants and little trees to a stick or other support. The clip rings are made of a very flexible polypropylene to ensure quick installation and easy locking. Because the finger contact surfaces are extra wide, a better grip is achieved avoiding damage to the fingers and the plant.

Type	Article No.	Colour	Dimensions carton	Pieces / carton	Pieces / pallet
16 mm	6CR16-GNN	green	60 x 40 x 33 cm	26,000	780,000
