

Okulette Budding Patches & Strips

Okulette budding patches provide you with the ideal budding material for grafting roses and shrubs.

The budding patch tightly encloses and seals the cut which makes it air and water tight putting even pressure on the bud promoting growth. The ties do not have to be removed, as the high quality thin budding rubber degrades after 3 or 4 weeks, after the union is established.

Budding Patch Sizes:

Code	Size	Description	Carton Weight	No. per Carton
030	32 x 35 x 0.5mm	For fruit stocks and shrubs	7.5kg	10,000
