FIRST AID:

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

IF INHALED: Remove to fresh air and keep at rest. Make comfortable for breathing.

IF SWALLOWED: Rinse mouth, give plenty of water.

IF ON SKIN: Wash with plenty of soap and water. Wash contaminated clothing before reuse.

Call a POISON CENTRE or Doctor if effects persist or you feel unwell.

24-hour Emergency Telephone Number – For advice contact the National Poisons Centre – 0800 POISON (0800 764 766) – or doctor, immediately. Have product container or label at hand.

STORAGE and TRANSPORT

The product must be segregated from combustibles and other incompatible substances. This includes explosive, flammable, toxic, infectious and corrosive (Class 1,2,3,4,6 and 8).

Store in a cool dry place. Do not carry on a passenger service vehicle.

SAFETY DATA SHEET:

A Safety Data Sheet should be available at all work places where Winter Feed 9-9-21TM is stored or used (available from Gro-Chem.)

DISPOSAL:

This product should be disposed of by use in the manner described on the label, or by depositing it in an approved landfill. Segregation from products of Class 1, 2, 3 and 4 must be maintained after disposal unless the properties of the product have been altered to remove the hazardous properties.

Dispose of empty packaging by burying in an appropriate landfill. DO NOT burn.

Approved Pursuant to the HSNO Act 1996, under the Fertilisers (Oxidisers [5.1.1]) group standard. No HSR002570. See www.ermanz.govt.nz for approval conditions

CONDITIONS OF SALE:

As no control can be exercised over the manner in which or the conditions under which this product is used, all conditions and warranties expressed or implied, other than those required by statute are excluded. No responsibility will be accepted for any damage or injury whatsoever arising from the storage, handling, application or use of this product.

DIRECTIONS FOR USE:

GRO-MORE Winter Feed 9-9-21TM is a maintenance fertiliser for cymbidium orchids during the winter flowering period. Its nitrogen level is adequate and practically all in the nitrate form. It contains relatively high levels of phosphorus and potassium to aid with flower quality and colour. It is a two part formula suitable for cymbidiums grown in all media. Gro-More Winter Feed 9-9-21TM should be used where average daily temperatures above 10degC are expected during the flowering period at a rate of 50-100% of the regular feed, depending on plant requirements.

Features: Fully soluble; Chelated trace elements; No precipitation or nozzle blocking; Buffered; Safe on foliage.

General use instructions: To dissolve, add each part to the water separately at a maximum concentration of 1kg per 4 litres of water, and stir until dissolved. The use of hot water will speed up the process.

Direct tank feeding: For maintenance feeding, dissolve 0.25kg of each part per 1000L or 10kg of each per 40,000L of water.

Injection: For an injection ratio of 100:1 dissolve 2.5kg of each part in 100L of water and inject separately.

Conductivity (at 20degC): A solution of the above at full dilution has a CF reading of 10.0. Remember to add the CF of the irrigation water to these figures.

Net Contents: 10kg
