

Propagation Seed and Cutting Cubes

Grodan Propagation Seed and Cutting Cubes ensure homogeneity and reliability, providing the basis for mechanising the process of uniform germination or striking of cuttings and a crop that can be transplanted successfully. This high health, high quality product can be hydrated with water and nutrients prior to seeding or sticking of cuttings directly into them. Each cube has a pre-drilled hole to the same depth and width in each cube to make ease of this process of seedling or the placing of cuttings. This substrate has an ideal air / water ratio, to optimise plant growth and development.

Propagation Cubes	Product Code	Dimension	Hole Size	Packing
		(L x W x H)	(mm)	Cubes / Carton
Grodan Lettuce / Herb (straight sides)	AO 122	25 x 25 x 40 mm	10/10	6000 / carton
