

PPS200[®] (OS Roll) Capillary Film

PPS200[®] (OS Roll) Capillary Film is a micro perforated plastic film. When placed over capillary matting it offers many advantages including; reduced evaporation, reduced algae growth, increased matting life, aids crop spacing and improves hygiene. All of this without impairing the capillary action of the matting.

PPS200[®] (OS Roll) is a capillary film with symbol prints spaced to permit easy, accurate spacing of pots on the bench. There are 4 different spacing systems, each with its own symbol.

PPS200[®] (OS Roll) is available in black film with grey symbols. It comes standard in 2 m x 300 metre rolls. **PPS200[®] (OS Roll)** is also available (on request) in combination with capillary matting.

Figure	mm. (Centre to Centre Spacing)	M ² (Number of Pots)
Dots	124	74.7
Circles	142	57.7
Triangles	166	42.9
Squares	199	30.2
