

Eliminate potential damage to your plants with **Bato**

Damaged stems and kinked trusses can have a huge impact on your crop's yield and quality. By eliminating damaged stems and trusses, Bato crop supports help your plants achieve their full potential.

- Mega clips - the best plant stem guidance. No more twisting around the twine. Available in 23 and 25 mm diameter.
- Flexible truss supports - support the first trusses so they don't snap
- Drop hooks
- Side shoot hooks - prevent side shoots from breaking off
- Cucumber turn hooks - ensure supple guidance of branches and stems along the horizontal crop wire
- Truss hooks - help support tomato trusses
- Grafting clips - flexible material for easy grafting and less damage to the plants
- Clip rings - these very flexible polypropylene clips help fasten pot plants or small vegetable plants to a stake or other support
- String tensioners - no more sagging strings, hanging plants or stems.
