

Safely control insects & *Powdery mildew*

eco-oil® & ecocarb®

eco-oil®

An organic insecticide/miticide based on botanical oil.

- Safe knock-down insecticide with some residual activity due to its repellent effects and ovicidal action.
- No withholding period.
- Controls two-spotted mites, aphids, whitefly, citrus leaf miner and scale insects with no potential for insect resistance.

ecocarb®

A specially formulated contact fungicide containing food grade potassium bicarbonate for the control of *Powdery mildew*.

- Fast and effective kill within minutes of contact via the creation of a large osmotic pressure differential on the fungal cells.
- Specially formulated with a high performance surfactant to maximise efficacy and crop safety.
- No withholding period.

Eco-oil® and EcoCarb® are registered pursuant to the ACVM Act 1997 No P7069 and P7072 respectively.
