

Vines lagging behind?

Boost them with **WUXAL®** Ascofol

Wuxal® Ascofol is a highly concentrated natural seaweed fertiliser suspension extracted from only one seaweed source, the brown algae *Ascophyllum nodosum*. This premium quality fertiliser is rich in micro nutrients and naturally occurring bioactive compounds.

Key benefits

- Contains 3% Boron, which improves pollen viability, fertilisation and fruit set
- Stimulates natural plant defence against stress related conditions
- Improves plant growth under stress conditions
- Promotes crop quality
- Optimum pH-value for foliar absorption.

WUXAL

Did you know?

All Wuxal® suspension fertilisers contain additional advanced additives which lead to higher absorption rates and efficiency:

- ✓ Anti-evaporants—prevent the micro-droplets from evaporating before they reach the leaves.
- ✓ Stickers—optimum leaf adhesion prevents the nutrients from being washed off easily by rain.
- ✓ Surfactants—even distribution of the spray solution on the leaf.
- ✓ Humectants—re-activation of the dried residual deposit for a longer absorption time.

Talk to your local Horticulture Rep for more information on Wuxal® Ascofol & the complete Wuxal® foliar nutrient strategy for kiwifruit.
