

CAUTION  
KEEP OUT OF REACH OF CHILDREN  
READ SAFETY DIRECTIONS BEFORE OPENING OR USING

# COMPANION

## SURFACTANT

ACTIVE CONSTITUENTS : 345 g/l SOYAL PHOSPHOLIPIDS  
355 g/l PROPIONIC ACID

**ACIDIFIES**  
**IMPROVES PENETRATION**  
**REDUCES ALKALINE HYDROLYSIS**

**20 LITRES**

## Directions for use

### Not for use with sulfonylurea herbicides

Situation	Application Rate	Critical comments
<b>Weedkilling sprays</b>		
General use	100 - 200mL /100 L	Companion can be used where the addition of a wetter/spreader is required.
Hairy or waxy leaves e.g. Nutgrass Hard to wet leaves e.g. Couch	300 - 500mL /100 L	Companion improves penetration on difficult to wet leaves and in tall dense vegetation.
Very cold conditions Dry dusty situation	500mL/100 L	The higher rate of Companion assists penetration in difficult situations.
<b>Glyphosate, Paraquat and 2,4-D</b>		
To improve penetration To reduce the effects of hard water	250 - 500mL /100 L	Companion is particularly beneficial with these herbicides to ensure even coverage of plant foliage and to increase absorption.
<b>High pH or Hard Water</b> To reduce the loss of efficacy caused by high pH or hard water	100mL/100 L	Addition of Companion to the spray tank will adjust the pH to 3.5 - 5 which will overcome the degrading effect of alkaline hydrolysis caused by water with a high pH. Pesticide breakdown will be reduced and spray activity will be maintained. As sensitive horticultural crops could suffer damage under low pH, do not reduce pH below 6.

**NOT TO BE USED FOR ANY PURPOSE OTHER THAN INDICATED ON THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.**

### GENERAL INSTRUCTIONS

SST Products Companion is a specialty adjuvant for use with herbicides and pesticides. Companion enhances the penetration of herbicides in situations where leaves are hard to wet due to waxy or hairy surfaces or in very cold or dry dusty conditions. Companion also reduces the degrading effect to many pesticides caused by alkaline hydrolysis. In situations where water is hard or has a high pH Companion slightly acidifies the water which improves the performance of many pesticides and extends the effective life in the tank. For sensitive horticultural crops check tank pH as levels below pH 6 could cause damage.

#### MIXING

Half fill the spray tank with water and add Companion under agitation. Add the recommended rate of agricultural chemical and top up the tank under agitation.

#### PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Toxic to fish. DO NOT contaminate streams, rivers or waterways with the chemical or used container.

#### STORAGE AND DISPOSAL

Keep out of reach of children.

Store in closed, original container in a well ventilated area, as cool as possible. Do not store for prolonged periods in direct sunlight. Triple or, preferably, pressure rinse containers before disposal. Add rinsings to spray tank or knapsack mix. Do not dispose of undiluted chemicals on-site.

If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, puncture and bury empty containers in a local authority landfill. If not available bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt.

#### SAFETY DIRECTIONS

Avoid contact with eyes and skin. Wash hands after use.

#### FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone 13 11 26. If swallowed, and if more than 15 minutes from a hospital, induce vomiting, preferably using Ipecac Syrup APF. If in eyes, hold eyes open and flood with water for at least 15 minutes and see a doctor. Additional information is listed in the Material Safety Data Sheet.

#### CONDITIONS OF SALE

The use of SST Products Companion being beyond the control of the manufacturer, no warranty expressed or implied is given by SST Products Pty Ltd regarding its suitability, fitness or efficiency for any purpose for which it is used by the buyer, whether in accordance with the directions or not and SST Products Pty Ltd accepts no responsibility for any consequences whatsoever resulting from the use of this product.
