### GENERAL INSTRUCTIONS

PENATRA is a highly penetrating surfactant suitable for use with Glyphosate herbicides and certain brushkiller herbicides. It improves the efficiency by enhancing the penetration and uptake into certain hard to control woody weeds such as bracken, gorse and perennial ryegrass. PENATRA is not a general purpose surfactant and should only be used where addition of a silicone surfactant is recommended.

### MIXING

Add PENATRA to spray tank after the agricultural chemical is thoroughly mixed.

### PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate streams, rivers or waterways with the chemical or used container.

### STORAGE AND DISPOSAL

Keep out of reach of children.

Store in closed, original container in a well ventilated area, as cool as possible. Triple or, preferably, pressure rinse containers before disposal. Add rinsings to spray tank or knapsack mix. Do not dispose of undiluted chemicals on-site.

Break, crush, puncture and bury empty containers in a local authority landfill. If not available bury the containers below 500mm in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and roots. Empty containers and product should not be burnt.
