

Penatra™

Organosilicone Non Ionic Penetrant for use with herbicide applications.

For Use With

- Glyphosate
- Certain brushweed herbicides to improve coverage, penetration and uptake on brush weeds, woody weeds and ryegrass

Performance Characteristics

- Rainfree Period (only 30-60 minutes)
The addition of Penatra™ will increase the rate of uptake for some herbicides and may reduce the rainfree period down to 30-60 minutes when sprayed on dry foliage.
- Penatra™ achieves very low surface tension
Penatra™ - 21 dynes per cm
- Better spreading and greater surface contact enhancing penetration through leaf surface.

Use Rates

- Use with Glyphosate Herbicides:
Bracken, Broom and Sweet Brier (boom spray, aerial spray or handgun) 200ml per 100 litres of spray solution
Perennial Ryegrass (boom spray, aerial spray or handgun) 100ml per 100 litres of spray solution
Gorse (handgun spraying) 200ml per 100 litres of spray solution
Bracken, Broom and Sweet Brier (knapsack spraying) 20ml per 10 litres of spray solution
- Use with other Brushkiller Herbicides:
Broadacre spraying - 100ml per 100 litres of spray solution
Knapsack spraying - 10ml per 10 litres of spray solution

Pack Sizes

- 1 Litre
- 5 Litres
- 20 Litres
